

## CLMN8

This column speaker sounds much broader than suspected by its design. Thanks to 8 integrated drivers it can handle any voice range, as well as any musical tone. The high dB-pressure ensures a broad range. A convenient switch allows you to switch it to 8 ohm as well as to 100 V projects. As such, not only its sound, but also the application opportunities are simply 'all round'. Good for any musical spicing of a presentation, in a church, the hall, etc. Available in a white or black aluminium enclosure.
