Safety warnings and precautions

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

THIS EQUIPMENT MUST BE GROUNDED

To ensure safe operation, the three-pin plug must be inserted only into a standard three-pin power outlet which is effectively grounded through normal household wiring. Extension cords used with the equipment must have three cores and be correctly wired to provide connection to the ground. Wrongly wired extension cords are a major cause of fatalities. The fact that the equipment operates satisfactorily does not imply that the power outlet is grounded or that the installation is completely safe. For your safety, if you are in any doubt about the effective grounding of the power outlet, please consult a qualified electrician.

The mains plug of the power supply cord shall remain readily operable. The AC receptacle (mains socket outlet) shall be installed near the equipment and shall be easily accessible. To completely disconnect this equipment from the AC mains, disconnect the power cord plug from the AC receptacle.

- Do not place this display on an uneven, sloping or unstable surface (such as a trolley) where it may fall and cause damage to itself or others.
- Do not place this display near water, like a spa or pool, or in a position which will allow the splashing or spraying of water onto the display, like in front of an open window where rain water may enter.
- Do not install this display in a confined space without proper ventilation and air circulation, such as in a closed cabinet. Allow proper space around the display for dissipating heat inside. Do not block any openings and vents on the display. Overheating may result in hazards and electric shock.
- Installation of this display should only be performed by a qualified technician. Failure to install this display properly may cause injuries and damages to the personnels and the display itself. Check the installation regularly and maintain the display periodically to ensure the best working condition.
- Use only the accessories approved or recommended by the manufacturer to mount this display. Using wrong or unsuitable accessories may cause the display to fall and result in serious personal injuries. Make sure that the surface and fixing points are strong enough to sustain the weight of the display.
- To reduce the risk of electric shock, do not remove covers. No user serviceable parts inside. Refer servicing to qualified service personnel.
- To prevent personal injuries, mounting the display or installing desktop stands is required before use.

Important safety instructions

1. Do not use this apparatus near water.
2. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
3. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
4. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
5. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
6. Only use attachments/accessories specified by the manufacturer.
7. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
8. Unplug this apparatus during lightning storms or when unused for long periods of time.
9. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

Notes on this display

- To prevent the risk of physical injuries, do not attempt to lift the display alone.
- Make sure you have four or more people available to help lift or a flat cart to transport the display to its final location.
- Keep the display horizontal as much as possible.
- Clear a floor space before unpacking.

Notes on the LCD panel of this display

- The Liquid Crystal Display (LCD) panel of this display has a very thin protective layer of glass which is liable to marking or scratching, and cracking if struck or pressured. The liquid crystal substrate is also liable to damage under excessive force or extreme temperatures. Please handle with care.
- The response time and brightness of the LCD panel may vary with the ambient temperature.
- Avoid placing the display in direct sun or where direct sun or spot lighting will shine onto the LCD panel, as the heat may damage the panel and the external casing of the display, and the bright light will make viewing the display more difficult than necessary.

- The LCD panel consists of individual pixels to display images and is manufactured according to the design specifications. While 99.9% of these pixels work normally, 0.01% of the pixels may remain constantly lit (in red, blue or green) or unlit. This is a technical limitation of the LCD technology and is not a defect.
- LCD screens, like plasma (PDP) and conventional CRT (Cathode Ray Tube) screens, are also susceptible to 'screen burn-in' or 'image retention' which can be found on the screen as visible fixed lines and shades. To avoid such damage to the screen, avoid displaying still images (like On-Screen Display menus, TV station logos, fixed/inactive text or icons) for more than 30 minutes. Change the aspect ratio from time to time. Fill the entire screen with the image and eliminate the black bars whenever possible. Avoid displaying images in 16:9 aspect ratio over a long period of time, otherwise there may be visible burn marks on the screen as two vertical lines.
- Note: Under certain circumstances, condensation may occur on the inner side of the cover glass, it's a natural phenomenon and will not affect the operation of the display. This condensation will usually disappear after around 2 hours of normal operation.
- RP series does not offer image retention function. For more information, please refer to installation guide. If a still image is required for a display, it is recommended to enable Pixel shift.
- RP series does not support portrait use; portrait use may cause display damage. BenQ warranty will not cover faulty usage.

Notes on cleaning the display

Please clean the frame when there is sign of malfunction on the touch screen.

1. Before you clean the screen, make sure the display is turned off, and unplug the power cord.
2. Remove dust or dirt from the screen with a dry cleaning cloth. Make sure to use minimal force, and don't press hard on the screen.
 - Never use paper towels or anything that could leave streaks or lint on the screen.
3. Moisten a clean soft, lint-free cloth with some cleaning alcohol such as 70% isopropyl. Gently go over the entire screen and wipe it down.
 - Never use hazardous chemicals or ammonia-based cleaners
 - Never fully soak the microfiber cloths in liquid.
 - Never spray liquids directly onto the screen.

Safety notice for remote control

- Do not put the remote control in the direct heat, humidity, and avoid fire.
- Do not drop the remote control.
- Do not expose the remote control to water or moisture. Failure to do so could result in malfunction.
- Confirm there is no object between the remote control and the remote sensor of the product.
- When the remote control will not be used for an extended period, remove the

batteries.

Battery safety notice

The use of the wrong type of batteries may cause chemical leaks or explosion. Please note the following:

- Always ensure that the batteries are inserted with the positive and negative terminals in the correct direction as shown in the battery compartment.
- Different types of batteries have different characteristics. Do not mix different types.
- Do not mix old and new batteries. Mixing old and new batteries will shorten battery life or cause chemical leaks from the old batteries.
- When batteries fail to function, replace them immediately.
- Chemicals which leak from batteries may cause skin irritation. If any chemical matter seeps out of the batteries, wipe it up immediately using a dry cloth, and replace the batteries as soon as possible.
- Due to varying storage conditions, the battery life for the batteries included with your product may be shortened. Replace them within 3 months or as soon as you can after initial use.
- There may be local restrictions on the disposal or recycling of batteries. Consult your local regulations or waste disposal provider.

BenQ ecoFACTS

BenQ has been dedicated to the design and development of greener product as part of its aspiration to realize the ideal of the “Bringing Enjoyment ‘N Quality to Life” corporate vision with the ultimate goal to achieve a low-carbon society. Besides meeting international regulatory requirement and standards pertaining to environmental management, BenQ has spared no efforts in pushing our initiatives further to incorporate life cycle design in the aspects of material selection, manufacturing, packaging, transportation, using and disposal of the products. BenQ ecoFACTS label lists key eco-friendly design highlights of each product, hoping to ensure that consumers make informed green choices at purchase. Check out BenQ’s CSR Website at <http://csr.BenQ.com/> for more details on BenQ’s environmental commitments and achievements.

Touch pen x2

Camera mounting kit

USB cover

Wireless USB Adapter (TDY31) *

Wall mount
(with installation screws)

User documents
(Quick start guide, wall mount installation guide, regulation sheets x3)

- *: Availability may vary. Purchase separately if the accessories are not included in the package.
- The type of power cord supplied may differ from that illustrated depending on your region of purchase.
- Before discarding the package, check that you haven't left any accessories inside the box.
- Dispose of packaging materials wisely. You can recycle the cardboard carton. Consider storing the package (if possible) for future transport of the display.
- Do not leave plastic bags within reach of young children or babies.

Setting up the display

Please pay attention to the following notes during installation:

- This display should be installed by at least two adult persons. Attempting to install this display by only one person may result in danger and injuries.
- Refer the installation to qualified technicians. Improper installation may cause the display to fall or malfunction.
- **Stability Hazard:** The flat panel may fall, causing serious personal injury or death. To prevent injury, this flat panel must be securely attached to the wall in accordance with the installation instructions.

Installing the display on a wall

1. Place a clean, dry and lint-free cloth on a flat, horizontal and object-free surface. Make sure that the size of the cloth is larger than the display.
2. Gently lay the display on the cloth with the LCD screen facing down.
3. Identify the wall mounting screw holes on the back of the display as shown in the illustration.

Dimension	VESA spec. (A x B)	Screw type	Quantity
65"	600 x 400 mm	M8 x 25L	4
75"	800 x 400 mm	M8 x 25L	4
86"	800 x 600 mm	M8 x 25L	4

4. Install the wall mounting bracket on the display and attach the display to the wall according to the mounting bracket's instructions. The length of the screw should exceed the thickness of the wall mounting bracket by at least 25 mm. Make sure that all screws are tightened and secured properly. (Recommended torque: 470 - 635N•cm). The mounting means should be strong enough to bear the weight of the display.

- To maintain proper ventilation, keep at least 10 mm of clear space from the back cover of the display to the wall.
- Please consult a professional technician for wall mount installations. The manufacturer accepts no liability for installations not performed by a professional technician.

Installing an external PC

The back of the display has four screw holes at its bottom-left side with a dimension of VESA mount 100x100mm. You can secure the PC onto the display with four screws (maximum torque: 4-5 kgf-cm).

Installing a camera mount

Check the mounting component list before installing:

Upper mount

Lower mount

1/4" screw (8mm)

M3x5 mm screw x 3

To install the camera mount:

1. Place your camera onto the upper mount and secure the camera by screwing the 1/4" screw into the camera's screw hole.

2. Install the lower mount with two M3x5mm screws and secure it on the top of the display.

3. Insert your camera with the upper mount attached into the lower mount.

4. Secure the camera mount by screwing a M3x5mm screw into the screw hole at the left side of the upper mount.

Parts of the display and their functions

Front panel

No.	Name	Description
1	TYPE-C	Connects to USB-C devices for charging and data transfer. Allows the transmission of video, audio, and touch function.
2	HDMI	Connects to a source device using a HDMI cable.
3	TOUCH-USB	Supports touch signal input from an external computer.
4	USB 3.0	Connect USB devices such as keyboards, mouse, and USB flash drives.
5	MIC-IN	Receives sound from a source device (e.g. microphone) via an audio cable.
6	AIR IONIZER	Releases negative ions.
7	Array microphones	Receives and transmits sound from near the display.
8	PIR sensor	Triggers the air ionizer when detecting human body near the display.
9	NFC sensor	<ul style="list-style-type: none"> • Tap NFC card for AMS login. • Use touch pen to launch EZWrite. Refer to Using touch pen to launch EZWrite on page 15 for more information.
10	Ambient light sensor	Detects the ambient light around the display.
11	IR signal receiver	Receives infrared signals from remote control.

No.	Name	Description
12	Power	Tap to enter energy saving mode. Press and hold for 4 seconds or more to power off.
13	Home	Press to return to the main screen.
14	Return	Press to return to the previous menu.
15	Menu	Press to enter the function menu.
16	Volume down	Press to decrease the volume.
17	Volume up	Press to increase the volume.

Input/output terminals

See [Connections on page 16](#) for connection details.

No.	Name	Description
1	LAN-OUT	Supports LAN Out, 10/100/1000 Mbps for external device.
2	LAN-IN	Supports LAN In, 10/100/1000 Mbps for Android system and OPS.

No.	Name	Description
3	LINE-OUT	Connects to external speakers or earphones.
4	SPDIF	Connects the SPDIF cable from external audio devices to the display for audio out.
5	AUDIO-IN	Receives audio input from an external device.
6	VGA	Receives input from an external device (such as a computer).
7	HDMI 1/HDMI 2	Connects to PC with an HDMI output, a set-top-box, or other video devices.
8	TOUCH-USB	Supports touch signal input from an external computer.
9	USB 3.0	Unscrew the USB cover to access the USB slot for the wireless USB adapter and the remote control USB receiver.
10	DP	Connects to a PC, or audio/video equipment that supports the DisplayPort interface.
11	RS232	Serial interface, used for mutual transfer of data between devices.
12	HDMI-OUT	Connects to display devices with an HDMI input.
13	TYPE-C	Connects to USB-C devices for data transfer.
14	USB 2.0	Connects USB devices such as keyboards, mice, and USB flash drives.
15	OPS Slot (Port)	Supports installation of an OPS (Open Pluggable Specification) device.
16	USB 3.0	Connects to USB devices such as web cameras or USB flash drives.

- USB 2.0= 5V \equiv 500mA / USB3.0= 5V \equiv 900mA
- Rear Type-C = 5V \equiv 0.9A
- Front Type-C =5V \equiv 3A; 9V \equiv 3A; 12V \equiv 3A; 20V \equiv 3.25A
- OPS= 18V \equiv 5A; 90W
- \equiv : Direct Current / DC
- \sim : Alternating Current /AC
- The maximum length for the cables to be used with the USB slots are 5m (USB 2.0) and 3m (USB 3.0).

Using remote control

Turns the display on or off.

Pointer key. Press to activate the spotlight or pointer function and follow the instructions on the screen.

Press to open Task Switcher to switch between recent apps and input sources.

Press to open or close the menu.

Direction key. Press for upward selection.

Direction key. Press for left selection.

Press to proceed

Direction key. Press for right selection.

Direction key. Press for downward selection.

Android system main screen button.

Return key

Voice command key. Press to activate Saffi (BenQ Voice Assistant), hold the button and say the supported command. Release the button until you finish the command.

Speak directly to the microphone built into the top portion of the remote control. Position the microphone closer to your mouth or speak in a loud and clear voice.

Volume up/down.

Freeze screen

One key for blank screen.

Microphone

The USB receiver to pair with the remote control. See [Using the BenQ Interactive Flat Panel by remote control on page 14](#) for more information.

Installing remote control batteries

1. Open the remote control battery cover.

2. Insert the supplied batteries, ensuring the positive and negative ends are facing in the correct direction.

 The supplied batteries are provided for your convenience so that you can operate the display straight away. You should replace them as soon as possible.

3. Put the cover back on.

Using the BenQ Interactive Flat Panel by remote control

Insert the remote control USB receiver into the USB ports at the bottom right corner of the back of the display.

- The remote control and the USB receiver have been paired by default.
- This remote control applies only to a specific model and operating systems. Contact your reseller if you have any question.

Pairing remote control and the USB receiver

If you are experiencing issues using the function key on the remote control, please follow the steps and pair again the remote control to resolve the issue:

1. Insert the USB receiver to Interactive Flat Panel's USB port and place the remote control near it.
2. Press the **V-** and **BLANK** at the same time, and the indicator light will start flashing.
3. The pairing is completed once the indicator stops flashing.

Remote control usage tips

- When using the remote control, aim the remote control at the sensor at the display's bottom-right side within a distance of less than 8m, and a horizontal and vertical angle of less than 60 degrees.
- Avoid getting the remote control wet or store it in humid environments (like bathrooms).
- If the display's remote control sensor window is exposed to direct sunlight or strong light, the remote control may not operate properly. In this situation, change the light source, readjust the angle of the display, or operate the remote control from a location closer to display's remote control sensor window.

Using touch pen to launch EZWrite

Tap the thick tip of the touch pen on the display's NFC sensor to launch EZWrite. Note that the horizontal and vertical angle should be less than 30 degrees.

Connections

Connecting power

Plug one end of the power cord into the power jack on the display and the other end into an appropriate power outlet.

- The supplied power cord is suitable for use with 110-240V AC power only.
- The power cord and outlet illustrated may differ from the ones used in your region.
- Only use an appropriate power cord for your region. Never use a power cord which appears damaged or frayed, or change the plug type on the power cord.
- Be aware of the power loading when you use extension cords or multiple outlet power boards.
- There are no user serviceable parts in this display. Never unscrew or remove any covers. There are dangerous voltages inside the display. Turn off the power and unplug the power cord if you intend to move the display.
- The illustration is for your reference only.

Connecting the VGA input

1. Connect the **VGA** port on the display to the VGA output port on a computer using a D-Sub (15-pin) cable.
2. Connect the computer's audio output port to the **AUDIO-IN** jack on the display using a suitable audio cable.

Connecting the touch module

Connect the **TOUCH-USB** port on the display to the USB port of a computer using the supplied USB cable. The touch module of the display supports easy Plug-and-Play operation. There is no need to install additional drivers on the computer.

- Connect **TYPE-C** port with the computer.
- **HDMI** must be used with **TOUCH-USB** at the front panel.
- **HDMI 1** or **DP** must be used with the **TOUCH-USB** next to **HDMI 1**.
- **HDMI 2** or **VGA** must be used with the **TOUCH-USB** next to **HDMI 2**.

- Avoid blocking the touch screen frame (where sensors are located) when initiating the touch module.
- If any ghost image occurs, please try to un-plug and then re-plug all USB cables. If the failure image still exists, use another USB Type-B to Type-A cable.
- It is highly recommended that you connect the display to the PC or laptop directly. Please be noted that using a faceplate device or an extender may cause failures in touch operations since the display quality can be affected by many uncertainties such as cable grade, cable quality, source and destination equipment, RF and electrical interference, and cable patches.

Connecting the digital inputs

1. Connect the HDMI or DisplayPort output port of a computer or A/V device (such as a settop box or DVD player) to the **HDMI 1/HDMI 2/HDMI/DP** input port on the display using an HDMI or DisplayPort cable.
2. To view video from this input, press  on the remote control to switch to the respective input source.

Connecting the video output

1. Use an HDMI cable to connect the **HDMI-OUT** port to the respective input port on the device.
2. Plug in the power cord and switch the power on.
3. Press  on the remote control to turn on the display.

Connecting to serial port

Directly connect a computer to the **RS232** port on the input/output terminals.

- The applicable cable is not supplied and should be purchased separately.
- This connection is applicable to straight-through RS-232C cable only.
- After using serial port line to connect central control equipment and machine, certain function of the machine can be controlled via central control equipment, such as: machine on/off, and adjustment of sound volume, etc.

Basic operations

Turning the display on or off

1. Be sure to follow the instruction of [Connecting power on page 16](#).
2. At the back of the display, flip on the power switch located on the lower left side to **On**. The system will enter standby mode.

- To turn on the display, press the power button on the control panel or on the remote control.
- To turn off the display, press the power button on the control panel or on the remote control. The system will automatically enter standby mode.

 The display's standby mode still consumes power. To completely cut off power supply, set the power switch to OFF (O) and then disconnect the power cord from the power outlet.

Initial setup

After you have connected the display to the power, you are ready to power on the display. The first time you power on the display, you will be guided through a series of setup screens. Follow the on-screen instructions or the steps below to start up your display and complete the initial setup.

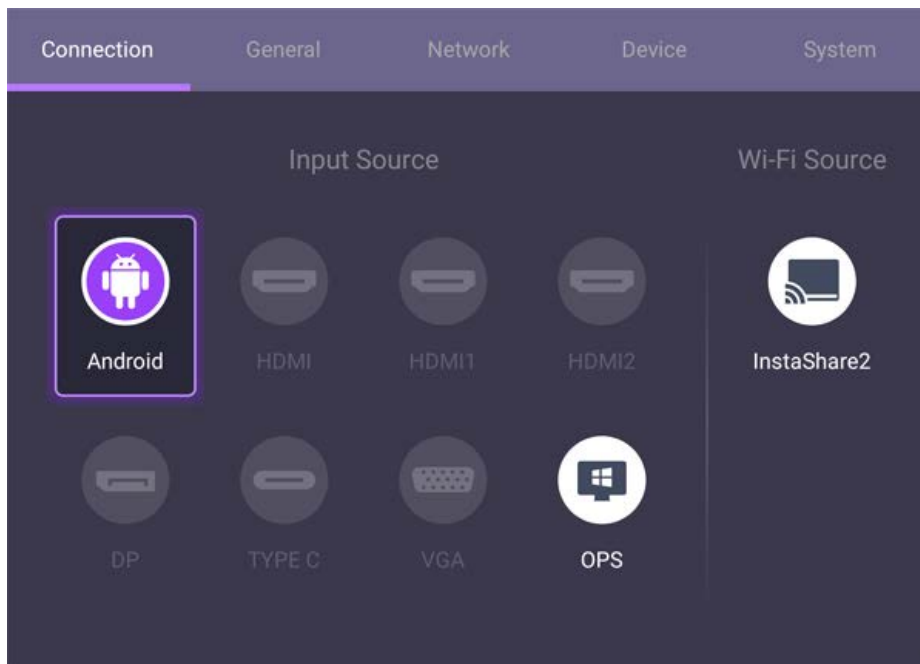

1. Turn on the display. Wait for the display to boot up with the BenQ screen. This may take a moment.
2. Tap **Next** on the screen to begin. Follow the on-screen instructions to set up the language, date and time, and network. Or you can skip some of these steps and complete the setup later.

OSD Settings

Use one of the following methods to enter the OSD menu:

- Press  on the remote control.
- Press the Menu button () on the front panel.
- Drag the OSD menu up from the bottom-center of the screen.

See [Menu operations on page 31](#) for more information on the OSD menus and their settings.

Switching input signals

Under the **Connection** tab of the OSD menu, you can select a desired input source. See [Input settings on page 31](#) for more information.

Account Information

Three types of accounts are provided: Guest, Admin, and Multiple users.

Guest

It's for public use under Guest account. You are able to change the headshot, wallpaper, volume and brightness.

Admin

Log in as Admin. Under **Personal settings**, you can change the headshot, wallpaper, and password. You can also enable AMS service, set **Available offline accounts**, and check **Device information**.

Multiple users

Before logging in as User, be sure to enter the correct email address and activate **AMS service**.

To access your personal account, you have to ask the administrator to activate AMS service first and create your account through **IAM** service. See [User Management on page 24](#) for more information.

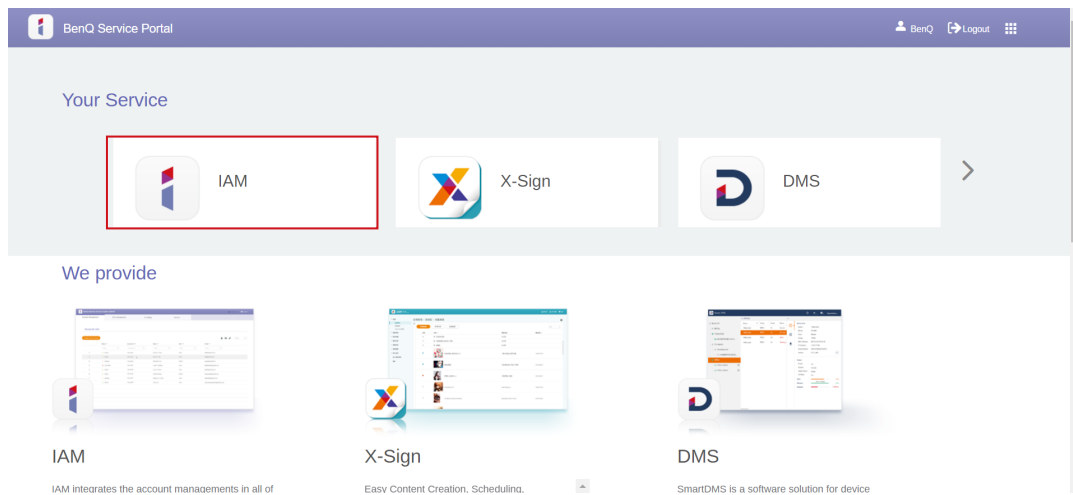

For more information and tutorial videos about the AMS service please visit <https://www.benq.com/en-us/business/ifp/account-management-system.html>.

User Management

To add a new user, please contact your IT manager to create your account through BENQ IAM web service.

Creating a new account

1. As an administrator to create a new account for regular users, go to BenQ Service website: <https://iam.benq.com>. Suggested browsers are Chrome and Firefox.
2. Log in and choose **IAM**.

3. Click **Create New Account** to continue.

4. Fill in the following fields. Be sure to enter the correct email address. Click **Submit** to create a new account.

- If some members in your organization need more privilege to control the AMS service, you can activate the users as other roles.
- You can also activate **X-Sign**, **DMS**, and **Broadcast** when creating user accounts. Switch to different services, **X-Sign**, **DMS**, or **Broadcast** by clicking the icon on the upper right corner..

Submit Cancel

5. The account has been created and a verifying email is sent to the new account owner.

Setting up the Internet connection

Your display must be connected to a network to conduct OTA updates or surf the Internet.

 To find the MAC address in Android OS, please go to **Settings > System > About > Status**.

Network setting

On the home screen, go to **Settings > System > About > Status**. If there is no IP address shown, please connect the display to the Ethernet cable.

Wireless connection

You must use a wireless adapter in order to connect the display to the Internet wirelessly. Please contact your local dealer for more information on configuring the wireless connection.

1. Press  on the remote control, or go to **Network > Wi-Fi**.

2. Insert the wireless adapter and the switcher will automatically change to **ON**. A list of

available networks will show on the screen.

3. Touch the network's name to connect to the network. The password is needed if it is your first time to use the network. Key in the password and press **Connect**. The device is now connected to the WLAN.

- If you are connecting to a secured wireless network, enter the password for the wireless network access when prompted and tap **Connect**.
- Please avoid using 5725~5875 MHz bandwidth 10 MHz. For example: 5G band 4 Channel 149, Channel 151.

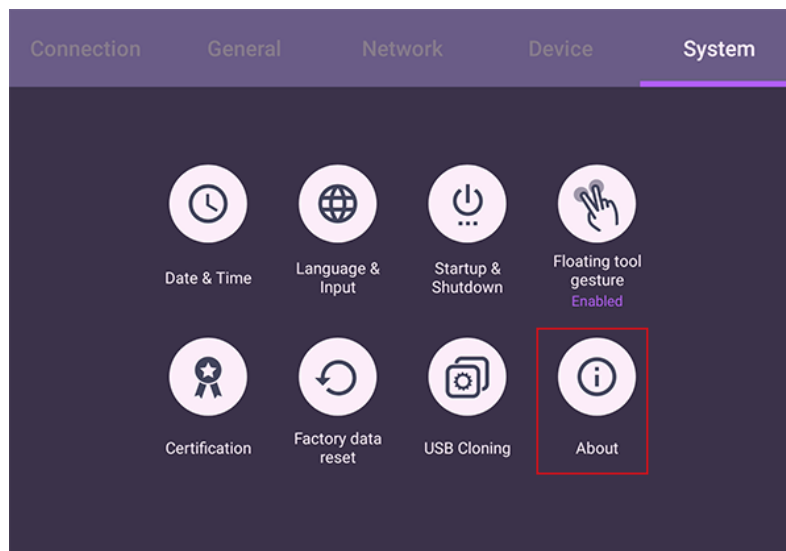

Updating software

Whenever a new version of software is available, the system will automatically detect the update and will prompt you to download it every time you turn on the display. If you want to update the software, choose **NETWORK UPDATE** or **USB UPDATE** to continue the update. Or you can skip this step and update the software later.

To manually update the software:

1. Go to **System > About > System updates**.

2. If there is an update available, the system will begin updating.

- Software update process may take some time to complete.
- During the update process, do not turn off the device or disconnect the Internet connection. Any interruptions during the software update process may permanently damage your display.

Adjusting audio volume level

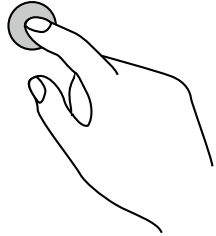

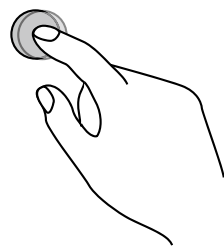

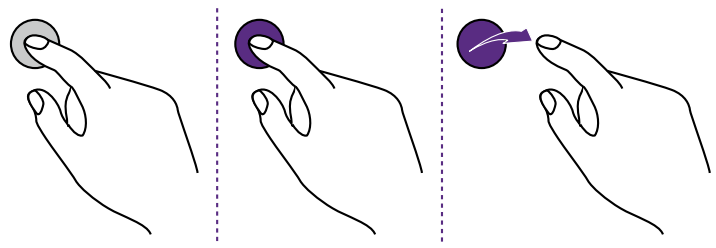

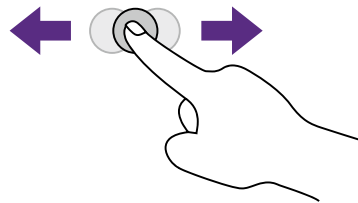

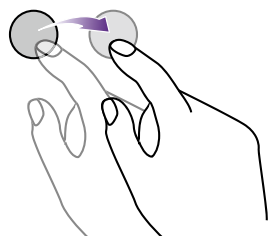

To adjust the audio volume level do either one of the following:

- Press **V+ / V-** on the remote control to adjust the volume.
- Press  /  on the front panel of the display.
- Go to **Settings > General** to adjust the volume. See [General settings on page 32](#) for more information.

Using the touch screen

You can use the optical touch screen to control your operating system. The following table shows a list of gestures you can use on the touch screen.

 Ensure that you have installed the USB cable on the display to a computer.

OS functions	Gesture actions
Click	<p>Tap the screen once.</p> 
Double-click	<p>Tap the screen twice.</p> 
Right-click	<ol style="list-style-type: none"> 1. Press on the target. 2. Hold and wait for a blue ring to appear. 3. Release your finger. 
Drag	<p>Drag one finger left or right.</p> 
Pan up / Pan down / Back / Forward	<p>Quickly drag your finger (Flick) in a desired direction.</p> 

OS functions

Gesture actions

Drag one or two fingers up or down.

Scrolling

Move two fingers apart or toward each other.

Zoom

Menu operations

To enter the OSD menu:

- Press  on the remote control
- Press  on the front panel
- Drag from the bottom-center of the screen

To make selections:

- Press  /  /  /  on the remote control and press **OK** to confirm or directly click an item.
- Press  on the remote control or click a blank area outside the menu to exit the menu.

Settings menu

Input settings

Under **Connection**, you can select a desired input source.

General settings

Go to **General** to access the **Audio** and **Picture** settings.

Audio

- Under **Audio**, use the volume bar to adjust the volume for the display.
- Directly swipe  to enable or disable **Mute**.
- Go to **More** to enter the Audio menu.

Picture

- Under **Picture**, use the brightness bar to adjust the brightness for the display.
- Directly swipe  to enable or disable **Auto Backlight**.
- Go to **More** to enter the Picture menu.

Eye-Care solutions (Hardware low blue light & Flick-free)

Blue light with wavelengths under 455 nm could affect vision. Eye-Care solution is designed for eyesight protection: the display provides proprietary eye-care technology with ultra-low blue light emission and no visible or invisible flicker within the range of 0-3000Hz, preventing eyestrain caused by extended sessions in front of a display. In addition, advanced anti-glare screen treatment minimizes distracting reflections and glare for optimal productivity and comfort.

Suggestions for long-term use of the display:

- Rest your eyes for 10 minutes after 30 minutes of continuous use.
 - For every 20 minutes of display viewing, look into the distance for 20 seconds.
 - When your eyes get sore and strained, close your eyes for a minute and then roll your eyes in all directions.
-

Low blue light & flicker free:

- The default setting of **Picture Mode: Standard** and **Color Temperature: Standard** is in accord with Low blue light TUV certificate.
 - The default setting is in accord with Flicker Free TUV certificate.
-

For more information about Picture settings, refer to [Picture settings on page 35](#).

What is Flicker-free?

The display with the Flicker-free technology maintains a stable backlight with a DC dimmer that eliminates the primary cause of monitor flicker, making it easier on the eyes. The flicker-free technology does not only give you a comfortable viewing experience but also offers a safer choice that protects your eyes.

Audio settings

Menu	Descriptions
Balance	Drag the knob to adjust the balance.
Sound Mode	Touch a preset sound environment. Options are Standard , News , Music , Movie , Sport , or User mode. Under User mode, you can adjust the level of frequency bands (10KHz, 5KHz, 1.5KHz, 500Hz).

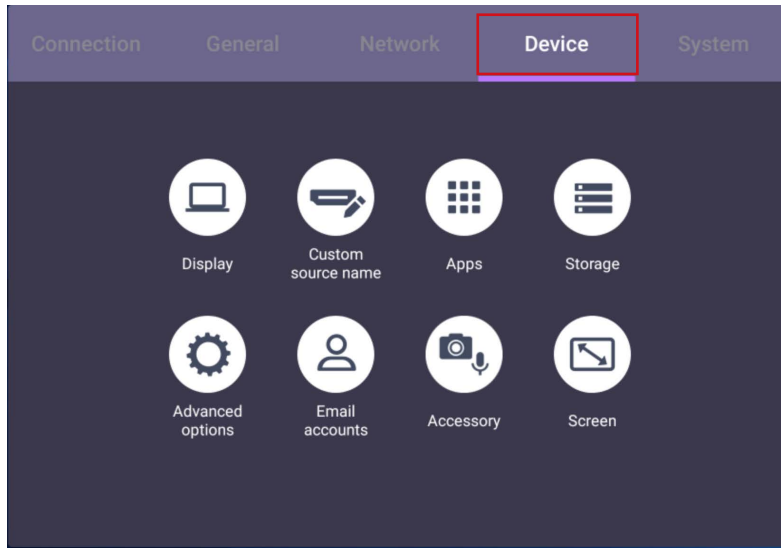

Picture settings

Menu	Descriptions
<p>Picture Mode</p>	<p>Press ▲ / ▼ / ◀ / ▶ on the remote control or click a picture mode. Options are Eco, Standard, Bright, Soft, Custom 1, Custom 2 and Custom 3.</p> <p> Under Android OS, all picture parameters (e.g., Brightness, Contrast) are locked. Users may only adjust the parameters while connecting to other input sources. See Input settings on page 31 for more information.</p>
<p>Color Temperature</p>	<p>Press ◀ / ▶ on the remote control or click a preset color temperature for the image. Options are Standard, Cool, and Warm.</p>

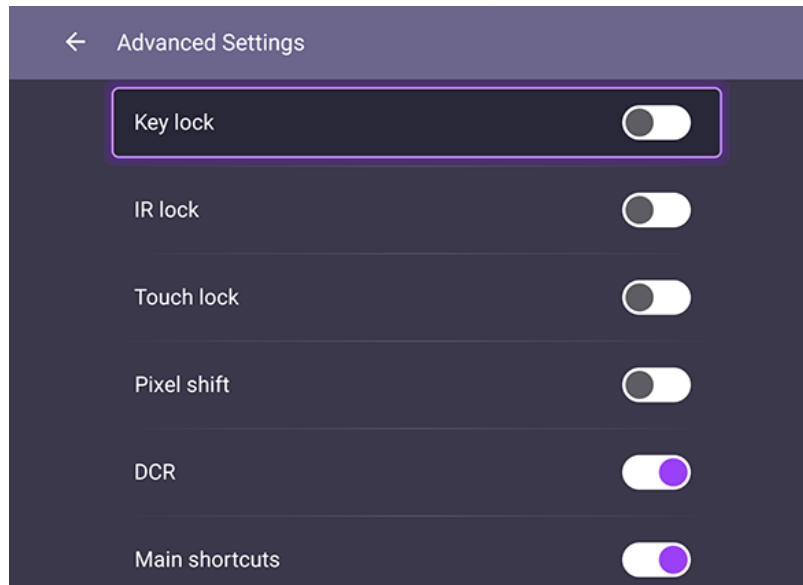

Device settings

Go to **Device** to access device settings.

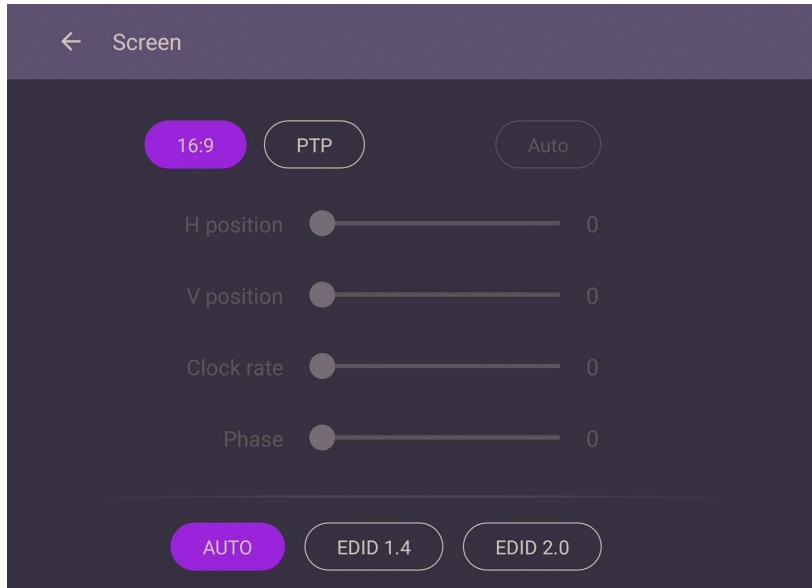

Menu	Descriptions
Display	Allows you to adjust the display's parameters.
Custom source name	Allows you to set unique names for each input source.
Apps	Accesses all the applications installed in the display.
Storage	Allows you to manage the display's storage.
Advanced options	Accesses more device settings. See Advanced settings on page 37 for more information.
Email accounts	Sets the display's email accounts.
Accessory	Displays current accessory information.
Screen	Allows you to adjust the display's image settings. See Screen settings on page 38 for more information.

Advanced settings

Menu	Descriptions
Key lock	Press OK on the remote control or click the switch to lock or unlock the buttons on the front panel of the display.
IR lock	Press OK on the remote control or click the switch to lock or unlock the remote control IR sensor on the front panel of the display.
Touch lock	Press OK on the remote control or click the switch to lock or unlock the screen.
Pixel shift	Press OK on the remote control or click the icon to set a pixel shift preventing from image retention.
DCR	Press OK on the remote control to enable or disable DCR .
	<ul style="list-style-type: none"> • If keypad, IR and touch are locked all at once, please follow the steps to unlock: Press  on the remote control for five seconds. • For image retention, please see Notes on the LCD panel of this display on page 2 for more information.

Screen settings

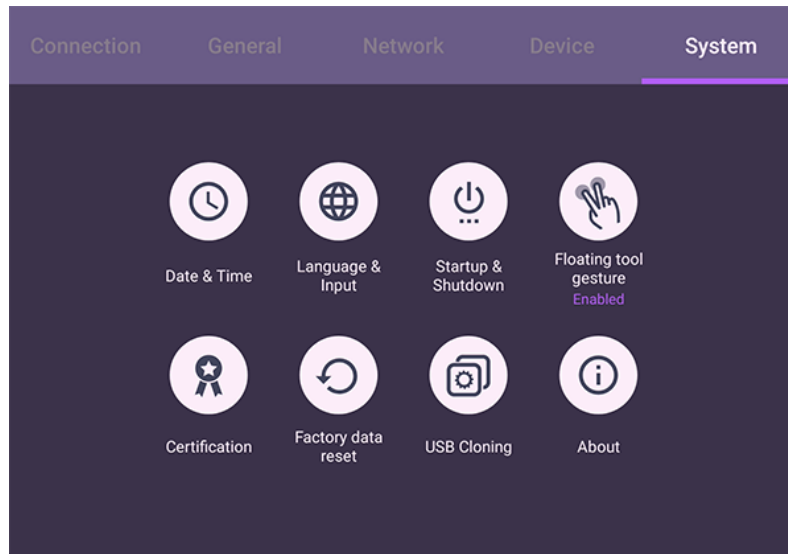

Press **</>** on the remote control or click an aspect ratio.

- Options are **16:9** or **PTP**. You can also select **Auto** to automatically adjust the image.
- Use the **H position**, **V position**, **Clock rate**, and **Phase** functions to manually adjust the image.

Menu	Descriptions
H position	Press to move the screen to the left or right.
V position	Press to move the screen to the top or bottom.

System settings

On the home screen, select **Settings > System** to enter system settings.

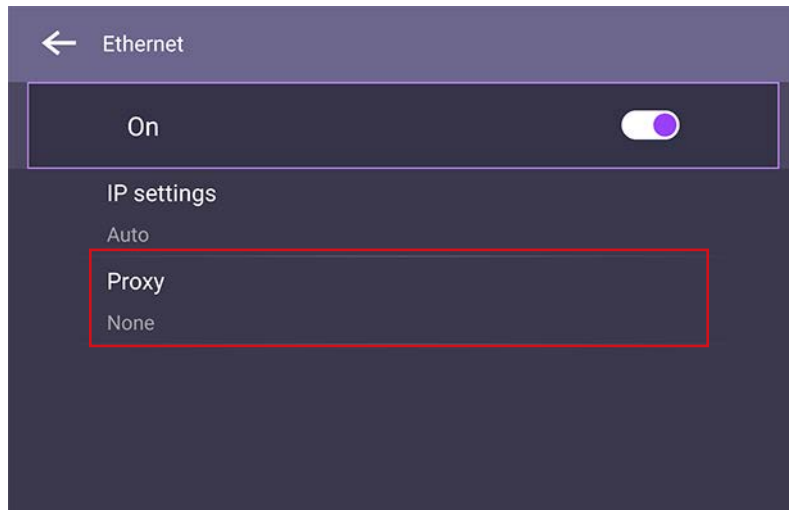

Menu	Descriptions
Date & Time	Click to set date, time, and their formats in Android.
Language & Input	Click to set Language, Keyboard & Input methods in Android.
Startup & Shutdown	Click to set the Startup channel, OPS Power options, Wake on Lan, and Power off reminder . See Startup & Shutdown on page 41 for more information.
Floating tool gesture	Click to enable/disable activating Floating tool with two fingers. See EZ Floating Tool on page 45 for more information.
About	Click to view system information in Android.
	The amount of available storage space for the user varies according to the amount of pre-installed apps and images occupying the total storage space.

Proxy setting

- Go to **Network > Ethernet**.

- Press **Proxy** to go to the proxy setting.

- Enter the proxy host name.
- Enter the using channel.

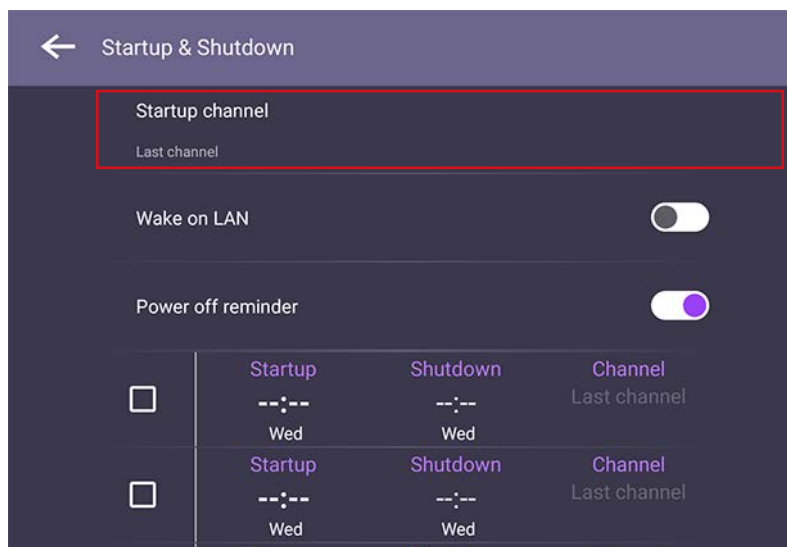

Startup & Shutdown

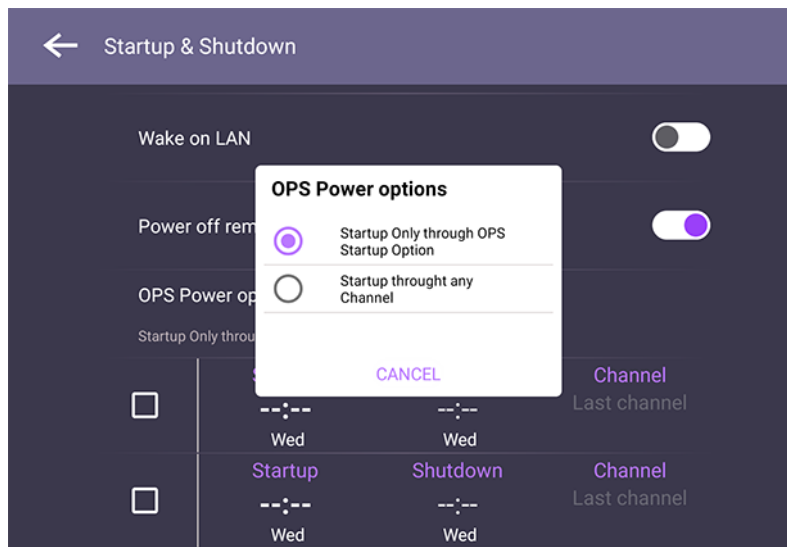

- Go to **System > Startup & Shutdown**.

- For **Startup channel**, you can choose **Last channel** or other sources.

- For **OPS Power options**, you can choose **Startup only through OPS startup option** or **Startup through any channel**.

- For **Power off reminder**, you can set on or off time. Schedules can be made by choosing the days of the week.

Android system interface

Note that this is a closed Android OS. Download and use of unauthorized apps on this system are not available.

Main interface

The display launches the Android main interface by default. To navigate the Android main interface:

- Press on the remote control or Home button on the front panel to return to the main interface.
- Press on the remote control or drag the OSD menu up from the bottom-center of the screen to enter the OSD menu to select an input.

Icon	Function	Descriptions
	Source	Press to enter the Connection menu to set input source.
	OSD Settings	Press to open or close the OSD settings menu.
	All Apps	Press to access all apps and widgets.

Side tool bar

Tap the side bars at the left or right of the Android main interface to access the side tool bar.

 You may drag the tool to the top or bottom of the screen to suit your preference.

Icon	Function	Descriptions
	Home	Tap to return to the main interface.
	Back	Tap to return to the previous screen.
	Recent	Tap to switch between recent apps and input sources.
	EZWrite	Tap to enter EZWrite annotation software.
	Freeze	Tap to freeze the current screen.
	Floating Tool	Tap to open the floating annotation tool.

EZ Floating Tool

The EZ Floating Tool allows you to quickly write or create annotations on any screen that the display is showing.

To access the floating tool use either one of the following methods:

- In the Android interface, tap in the side tool bar.
- Under any input source or in the Android interface, touch and hold two fingers spaced about 20 – 50 mm apart on the screen for more than two seconds to launch the EZ Floating Tool menu as shown below.

Icon	Function	Descriptions
	Minimize/Restore	Click to minimize or restore the floating tool.
	Close	Click to close the floating tool.
	Pen	Click to enable the Pen tool.
	Highlighter	Click to enable the highlighter tool.
	Laser pointer	Click to enable the laser point on the screen.
	Eraser	Click to erase annotations on the screen. You may use a finger eraser or choose to clear all annotations
	Toolbox	Click to open the toolbox which includes the Calculator, Timer, Stopwatch, Scoreboard, and Draw tools.
	Recording	Click to start recording the screen.
	Screenshot	Click to take a screenshot of the screen.
	Operation mode	Click to hide all the annotations and operate the main interface.

CO₂ Sensor

The concentration value of CO₂ sensor may vary depending on the environment such as temperature, humidity, and placement (by windows or under air conditioning). This means that the CO₂ sensor will always accurately measure the increments between ppm levels, but the baseline of the measurement may shift over time.

It is normal if the concentration value is slightly higher or lower than its original calibration.

The CO₂ sensor has a self-correction mechanism to make the sensor more in line with the current installation environment, so that the value can be more accurate. If your display is not used or stored for a long time, please calibrate before using the CO₂ sensor. To start the calibration, follow the directions.

Auto calibration

To provide correction for the optimal CO₂ concentration for the current environment, the calibration mechanism will collect the CO₂ concentration value for 25 consecutive hours to meet the temperature and humidity of the current space.

During the automatic calibration, do not interrupt or turn off the power supply. Do not move the display and make sure that the display is in an environment with good ventilation, to ensure a better calibration result.

AMS file manager overview

With this application, you can access your personalized workspace environment and settings, and manage your files and accounts on any display that you have logged into. To access the AMS files use either of the following methods:

- Tap the file manager shortcut .
- Tap the AMS shortcut .

While logging in, you will see four main parts, as described in the table below:

Name (A->Z)	Size	Time
20200211	1 item	2020-02-11 07:26
Alarms	0 item	2020-02-05 17:23
Android	1 item	1970-01-01 01:01
DCIM	0 item	2020-02-11 06:24
Download	1 item	2020-02-05 17:23
EZWrite5.0	1 item	2020-02-11 06:23
Movies	0 item	2020-02-05 17:23
Music	0 item	2020-02-05 17:23
Notifications	0 item	2020-02-05 17:23
OtaClient	0 item	2020-02-05 17:23

No.	Item	Description
1.	Source Selection	You can open files from the cloud storage services like Google Drive, Dropbox, or Network Drive . You can also open files from the local devices like Internal, My Folder , or connected USBs.
2.	Folder Path	You can browse the file folder in this area.
3.	Listing Files	You can see a list of files from the storage device you select.
4.	Operating Tab	You can edit the files using the operating tabs here.

Regular users can only view their own files, while the local admin can view all users' files in the domain.

Multimedia files

Multimedia files such as images, audio files, and videos can be played by directly tapping on the file icon.

Image

Select an image file you want to show on the display and perform any of the functions shown on the screen.

Icon	Function
	Exits the image viewer.
	Plays the previous/next image file.
	Magnifies/Shrinks the current image.
	Rotates the current image clockwise.
	Plays in slideshow mode.
	Opens slideshow settings.
	Changes the position of toolbar.

Audio/Video

Select an audio/video file you want to play on the display and perform any of the functions shown on the screen.

Icon	Function
	Changes cycle mode.
	Plays the previous/next file.
	Plays/pauses the current file.
	Adjusts the volume level.

Apps

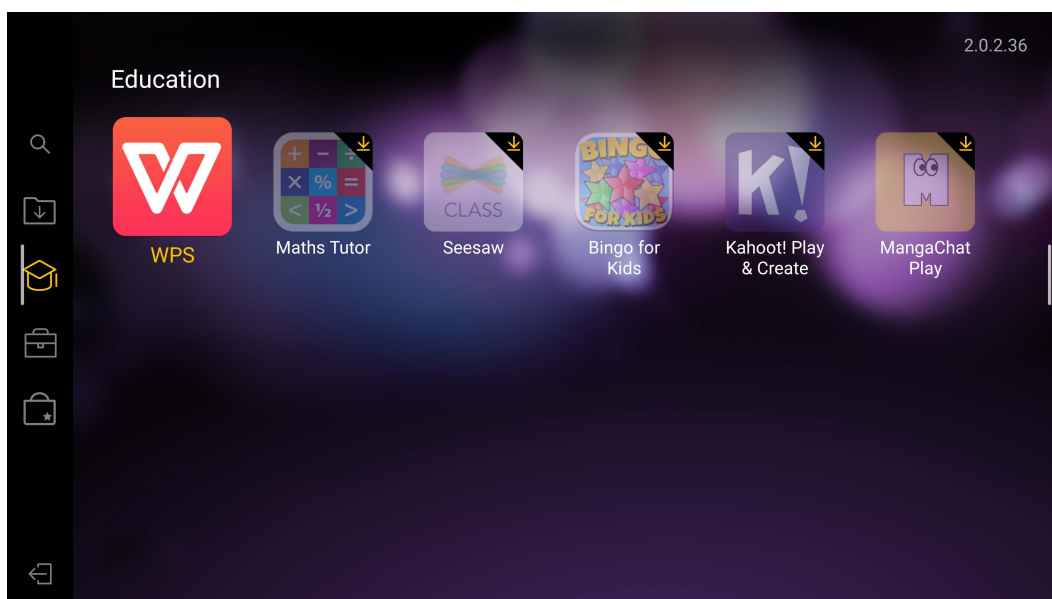

Tap the desired app to launch the app.

Application Name	Description
BenQ App Store 	Allows you to download recommended apps. See BenQ App Store on page 55 for more information.
BenQ Notification 	Allows you to receive upgrade notifications of existing apps and information of new apps available for download.
EZWrite 6 	An interactive whiteboard software solution that turns your display into a digital canvas. See Using touch pen to launch EZWrite on page 15 .
InstaShare 2 	Allows screen mirroring and touch control for collaborative meetings. See InstaShare 2 on page 56 for more information.
InstaQPrint 	Allows you to print a file or website image using a Wi-Fi or remote printer.
WPS Office 	Allows you to read PDF files or edit files created in Microsoft Office, PowerPoint, or Excel. See WPS Office on page 58 for more information.
TeamViewer Meeting 	Gives you access to instant or scheduled group meetings with any other TeamViewer Meeting users.
Saffi 	Allows you to control your display through voice assistant. See Using remote control on page 12 .  Find Saffi User Manual for more information. Go to www.BenQ.com > Business > SUPPORT > Downloads > model name > User Manuals > Saffi User Manual.

BenQ App Store

Tap  to launch **BenQ App Store**. With this application, you can view apps suggested by BenQ for download.

Tap the category on the left panel to browse the suggested apps.

Function	Description
Search ()	Search for an app.
Update Center ()	Allows you to update the BenQ Store app.
Education ()	Lists th suggested apps in the Education category
Corporation ()	Lists the suggested apps in the Corporation category
BenQ Apps ()	Lists the available BenQ apps.
Exit ()	Close BenQ Store.

InstaShare 2

InstaShare 2 (📶) is a software-based solution for multi-user collaboration, which lets users to share contents with all devices in a meeting wirelessly.

Use either way to access **InstaShare 2**:

- On the Android main interface, select **Wireless Projection** (📶).
- Select All Apps (🗄️) > **InstaShare 2** (📶)

🔑 Before launching the application, make sure your display is properly connected to the Internet.

When you enter **InstaShare 2**, the main interface is shown as below:

No	Function	Description
1	Tutorial window	Follow the guide to connect and pair your device with the display. Select the device OS type below to see the projection tutorial respectively.
2	Information window	Shows the display name, pairing code and connection password while presenting.
3	Host Controls window	Allows you to control the whole session and participant actions. You can also install InstaShare 2 app to manage the meeting session remotely

InstaQPrint

Tap  to launch InstaQPrint. With this application, you can print a file or website image using a Wi-Fi or remote printer.

- Before launching the application, make sure your display is properly connected to Internet.
- For the list of supported printers, see https://printhead.com/list_of_supported_printers.php.

1. Tap the option on the left panel and browse and select the desired file, photo, page, or image you want to print.
2. Tap **Manage Printers** to choose which printer that you want to use.
3. To select a printer:
 - Tap an option from the list of available printers on the left panel.
 - Tap **Scan** for Wi-Fi Printers to search for printers automatically.
 - Tap **Manual Setup** to add a new printer manually.

WPS Office

Tap  to launch WPS Office. With this application, you can open document files including PDFs as well as Microsoft Word, PowerPoint and Excel documents.

To edit a file with WPS Office:

1. Tap **Open** on the left panel to browse and open a file located in either the display's internal memory, an external storage device, or cloud storage.
2. Tap the function menu on the top panel to access the file format's various functions.

The description below is for a PowerPoint file, the function menus for other file formats will vary.

Function	Description
File	Tap to open, save, share, print, and manage your presentations.
View	Tap to change or edit the presentation views.
Play	Tap to start or set up a slide show.
Edit	Tap to edit the content or format of the slides.
Insert	Tap to insert tables, pictures, charts, comments, video, or audio.

Function	Description
Transitions	Tap to apply or adjust the timing of a transition.
Pen	Tap to write, draw, paint or sketch to the slides.
Play	Tap to start a slide show.
Save As	Tap to save the presentation file on either the display's internal memory, an external storage device, or cloud storage.
Undo	Tap to undo an action.
Redo	Tap to redo the last action.
Close	Tap to close the presentation file.
Back	Tap to return to the previous page.
Next	Tap to go to the next page.
Exit	Tap to exit WPS Office.

Supported Office versions and file formats

Supported Office versions: 97 / 2000 / XP / 2003 / 2007 / 2010 / 2013 / 2016

Troubleshooting

Problem	Solution
No picture	<p>Check the following:</p> <p>Is the display turned on? Check the power indicator of the display.</p> <p>Is the signal source device turned on? Turn on the device and try again.</p> <p>Are there any loose cable connections? Make sure that all cables are connected firmly.</p> <p>Have you chosen an unsupported output resolution on the computer? Refer to Supported input signal resolution on page 67 to select a supported resolution and try again.</p> <p>Have you chosen an unsupported output resolution on the DVD or Blu-ray disc player? Refer to Supported input signal resolution on page 67 to select a supported resolution and try again.</p>
No sound	<p>Check the following:</p> <p>Have you turned on the mute function on the display or the input source device? Turn off the mute function or increase the audio volume level and try again.</p> <p>Are there any loose cable connections? Make sure that all cables are connected firmly.</p>
The computer input image looks strange	<p>Have you chosen an unsupported output resolution on the computer? Refer to Supported input signal resolution on page 67 to select a supported resolution and try again.</p> <p>Use the Auto function (VGA only) to let the display automatically optimize the display of computer image.</p> <p>If the result of the Auto function is not satisfactory, use the Phase, H Position and V Position functions to manually adjust the image.</p>
The control panel buttons do not work	<p>Have you locked the control panel buttons? Unlock the buttons and try again.</p>

Problem	Solution
The remote control does not work	<p>Have you locked the remote control function? Unlock the function and try again.</p> <p>Check for incorrect battery orientation.</p> <p>Check for dead batteries.</p> <p>Check your distance and angle from the display.</p> <p>Check whether remote control is properly being pointed at the display's remote control sensor window.</p> <p>Check for any obstacle between the remote control and the remote control sensor window.</p> <p>Check that the remote control sensor window is not under strong fluorescent lighting, or in direct sunlight.</p> <p>Check for any devices (computer or personal digital assistant, PDA) nearby that transmit infrared signals which may cause interference to signal transmission between the remote control and the display. Turn off the infrared function of these devices.</p>
Remote control failure	<p>Check whether there are other objects between remote control and television remote control receiving window, thus leading to failure of remote control.</p> <p>Check whether the battery electrode in the remote control is correct.</p> <p>Check whether remote control needs to replace battery.</p>
Machine automatically shutdown	<p>Whether set sleep or not.</p> <p>Check whether there is sudden power outage.</p> <p>Check whether there is no signal automatic shutdown.</p>
Signal out of range	<p>Check whether display is set correctly.</p> <p>Check whether resolution is the best resolution.</p> <p>Adjust line and field synchronization in menu.</p>
Background has vertical lines or streaks	<p>Select automatic correction in menu.</p> <p>Adjust clock and phase position in menu.</p>
Image lack of color, color is incorrect	<p>Check whether VGA is not well connected or has quality problem.</p> <p>Adjust chromaticity and brightness or contrast in menu.</p>
Display format that is not supported.	<p>Select automatic correction in menu.</p> <p>Adjust clock and phase position in menu.</p>

Problem	Solution
Touch function invalid	<p>Check whether touch driver is installed and started.</p> <p>Check whether the size of article touched is comparable with finger.</p>
Touch positioning not correct	<p>Check whether driver is properly installed and make correction.</p> <p>Check whether touch pen is facing the screen.</p>
No picture and no sound	<p>Check whether the machine is started state.</p> <p>Check whether signal wire is well plugged, whether INPUT is corresponding to it.</p> <p>If in internal computer mode, check whether internal computer is started.</p>
With horizontal or vertical stripes or image dithering	<p>Check whether signal wire is well connected.</p> <p>Check whether other electronic equipment or power tools are placed around the machine.</p>
No color, color is weak or image is weak	<p>Adjust chromaticity and brightness or contrast in menu.</p> <p>Check whether signal wire is well connected.</p>
With image but without sound	<p>Check whether mute button is pressed for mute.</p> <p>Press VOL+/VOL- to adjust volume.</p> <p>Check whether audio line is connected correctly.</p>
Only one speaker has sound	<p>Adjust sound balance in menu.</p> <p>Check whether computer sound control panel only sets up one sound channel.</p> <p>Check whether audio line is connected correctly.</p>
VGA output without sound	<p>Check whether connect external device with headphone cable.</p>
