

Introduction

The Atlona **AT-OME-MH21-CP** is a compact, versatile switcher with HDMI and USB-C inputs. It is equipped with features for complete AV integration in huddle rooms and small meeting spaces, including automatic switching and display control, audio de-embedding, and a USB 3.0 hub for video conferencing peripherals or touch displays. Part of the Omega[™] Series of integration products for modern AV communications and collaboration, the OME-MH21-CP is HDCP 2.2 compliant and supports 4K HDR and 4K/60 4:4:4 at HDMI data rates up to 18 Gbps. Additionally, 4K downscaling to 1080p @ 60, 30, or 24 Hz is available when connected to an HD display. The OME-MH21-CP includes USB 3.0 and USB-C interfaces for two host PCs, plus two peripheral devices such as a camera, microphone, speakerphone, touch-enabled display, or keyboard and mouse. The USB-C port provides up to 60 watts of device charging capability for laptops and mobile devices.

Applications

Huddle rooms and small meeting spaces

The OME-MH21-CP provides a compact, yet comprehensive and cost-effective integration solution. When installed below a meeting table, the available Pocket[™] 3H (AT-PKT-3H) provides convenient tabletop AV and USB cable access for easy BYOD connectivity.

• Video conferencing

This switcher provides interfacing with USB devices for soft codec conferencing, with video and USB switched together between two host PCs. The USB interfacing is also ideal for a touch-enabled display, enabling on-screen control of a PC.

Key Features

Two-input AV switcher

- HDMI and USB-C inputs.
- No need to provide an adapter for USB-C to HDMI.

USB-C input for AV, data, and device charging⁽¹⁾

- Provides immediate compatibility with laptops and tablets with USB-C ports supporting AV output.
- Delivers up to 60 watts of charging for laptops and mobile devices.
- Allows clutter-free, single cable connectivity to a PC for video conferencing and collaboration.

Integrated USB 3.0 hub

- USB type B interface for connection to a host PC, plus two USB type A ports for a peripheral device such as a microphone, speakerphone, camera, or touch display. USB-C input is also available for data connection to a host PC.
- Provides an ideal USB integration solution for software video conferencing, and other applications.

Selectable 4K to 1080p downscaling

- Integrated video processing available for down-converting 4K/UHD @ 60, 30, or 24 Hz to 1080p.
- Ideal for applications with 1080p displays.

Automatic display control

- Automatically changes display power state based on active or standby mode of the switcher. Control signals to display are transmitted via IP, RS-232, IR, or CEC.
- Embedded, comprehensive selection of display drivers from the Velocity[™] System driver database.
- Enables effortless, automated system operation without the need for an external control system.

Automatic input selection using hot plug detect and video detection technology

- Selects active input when sources are connected or if there is a change in source power status.
- Enables simplified, automatic system operation without user intervention.

Audio de-embedding

- De-embeds two channel PCM audio and delivers to a balanced, analog audio output.
- Provides direct interfacing into an external audio system.

Footnotes

(1) The cable used for USB-C connection should support at least USB 3.1 Gen. 1, 4K @ 60 Hz video, and 60 W of power delivery.

(2) Scaler does not support frame rate conversion.

(3) 4:2:0 is not supported over USB-C.

(4) When USB SuperSpeed (SS) mode is enabled, video output is supported up to 4K @ 30 Hz and the USB data rate

is 5 Gbps. If disabled, video output is supported up to 4K @ 60 Hz and data rate is limited to 480 Mbps.
