

## GN-OSIR-M1501-CM Specification Sheet

### Osiris Wired Expansion Ceiling Microphone

#### Description

---

The GN-OSIR-M1501-CM is a wired expansion ceiling microphone for the Osiris audio DSP system (GN-OSIR-Z1199). Designed for classrooms, conference rooms, and other sound pickup environments, it connects to the Osiris DSP hub via CAT cable and provides high-quality omni-directional audio pickup. The microphone mounts to the ceiling and can be installed using the optional GN-OSIR-Y1501-MT telescoping ceiling mount pole.

#### Applications

---

##### Classrooms

- Ceiling-mounted microphone pickup for hybrid learning systems, feeding audio to the Osiris DSP for echo cancellation and distribution.

##### Conference Rooms

- Expand the Osiris microphone system with additional pickup zones for complete room coverage.

#### Key Features

---

- Wired ceiling microphone for use with the GN-OSIR-Z1199 Osiris DSP.
- Connects to the Osiris DSP hub via CAT6 cable.
- Omni-directional pickup pattern for broad room coverage.
- Compatible with optional GN-OSIR-Y1501-MT telescoping ceiling mount pole.
- Clean, low-profile ceiling installation.
