

# RE2040

With an almost frameless grill of 1 millimetre and a thickness of just under 5 millimetres, this loudspeaker gives short shrift to modern-day standards. The titanium driver with neodymium magnet and patented® suspension allows you to point it in any desired direction. The Intiimi series purifies the signal from the amplifier via an advanced separation filter and a correction filter. The front plate and basket are moulded from one piece which helps reduce resonance. You can build the RE2040 into a ceiling, but also into a wall. Almost imperceptibly flat, you can even paint over it without a problem.

- ① swivel tweeter in an acoustic shell
- ② manual treble control

At home or at the office? The RE2040 was developed to be an allrounder, but no matter what the application, it always provides top performance.
