

UNI30T

Universals. The name gives the game away: they can be used anywhere! Not only in terms of location, but sound too. Thanks to the timeless design, the Universals embodies a striking neutrality. On the other hand, with respect to performance, it's quite dominant: warm, detailed and with a wide reach thanks to ArtSound sound technology. This T-version is fitted with a transformer, allowing different units into one circuit. The unit is dust- and moisture-resistant. The plug-in screw terminal facilitates easy connection of the speaker cable.
