

M TILT - 1 CLAMP, MILLIMETER CALIBRATION SYSTEM ON 3 AXES AND ROTATION FOR MATRIX AND QUICK COUPLING TO TRUSS

SKU = V12H006AT0

Installazione	Truss-mounted cage
Modalità	Landscape
Material	Acciaio, Ottone, Alluminio
Treatments	Powder coated
Color	Silver, Black
Pitch	+/- 10°
Roll	+/- 10°
Mount Rotates	360°
Clamp fissaggio a traliccio	Ø 48 – 51 mm
SLW (CARICO DI LAVORO SICURO)	250 Kg (each Clamp)
Vite fissaggio clamp	M10
Dimension	180 x 180 _ 360 [mm]
Imballo	200 x 200 _ h380 [mm]

M TILT is a support system enabling cage-to-truss fastening with an aliscafo (clamp) and micrometric adjustment on the 3 Cartesian axes and 360° rotation to be added to MATRIX cages.

All three adjusting options are very precise (and can be checked with threaded pins) and the system is equipped with safety locks to fasten the desired position.

Thanks to its complete rotation and the wide tilt angles, it enables pre-emptive orientation when used together with the cage - also for complex installations with unpractical fastening positions or in case of special tilted projections.
